Atiyeh Rezghian Moghadam

Product Owner

👤 Profile

I am a **Product Owner** with a demonstrated history of team success and working in agile environments. I have successfully led and collaborated with **cross-functional teams** using **Agile Methodologies** to deliver innovative solutions that **meet business** and **customer needs**.

I have a strong background in **Product Management**, **User Research**, and **Business Analysis**. My passion is to look for a challenging role where I can apply my expertise and creativity to create products that make a positive impact.

💼 Work History

Product Owner at Iran Server

Sep 2019 – Present

Iran Server started its activity in 2002 and soon became one of the **biggest and most well-known** companies for providing web hosting in Iran. Now, Iran Server has more than **+200,000 active customers** which is growing fast.

As a Product Owner I do the following:
- Product roadmap definition
- Product backlog Management
- Prioritizing of needs
- Prioritizing and ordering items in the product backlog
- Monitoring the development process
- Predicting customer needs
- Evaluating product progress in each iteration
- Facilitating publishing planning, sprint planning, retrospective, responsible task creation, and story writing in JIRA
